MK-100

USER-FRIENDLY CONTROLS

The programmable electronic counter allows the operator to enter the desired cut length, the machine then automatically stops at the preset length for near perfect accuracy on each and every cut. This innovative feature allows the operator to watch & inspect the material as it rolls across the machine.

PORTABLE

High quality castor wheels allow for one person to move the **MK-100** with ease. Space is never an issue with the compact, portable design of this model.

OPERATING

The **MK-100** is equipped with a foot activated cable system along the front and sides of the machine; simply step on the cable to run the machine. This feature allows you access on 3 sides to inspect your material.

CUTTING

Powered by an electronic gear motor, the upgraded cable driven cutting system easily cuts most carpet & vinyl flooring ensuring for a straight, clean cut. The 2 way design enables the **MK-100** to cut in both directions allowing the operator to process jobs quickly and efficiently. Blade changes are a simple process taking just minutes.
